Journal of APPLIED PHYSIOLOGY

VOLUME 32 *January–June 1972*

EDITORIAL BOARD

SECTION EDITORS

Circulation—D. F. Bohr; F. J. Klocke; W. C. Randall

Respiration—L. E. Farhi; Solbert Permutt

Renal and Electrolyte Physiology—W. B. Kinter; E. E. Windhager

Gastrointestinal Physiology—S. G. Schultz

Endocrinology and Metabolism—N. S. Halmi; F. E. Yates

Environmental Physiology and Exercise—J. D. Hardy

Comparative and General Physiology—L. B. Kirschner

Neurobiology—J. deC. Downer

Hematology—O. D. Ratnoff

Muscle Physiology—F. N. Briggs

Contents of Volume 32

Key to Sections:
1. Circulation
2. Respiration
3. Renal & Electrolyte Physiology
4. Gastrointestinal Physiology
5. Endocrinology & Metabolism
6. Environmental Physiology & Exercise
7. Comparative Physiology
8. General Physiology
9. Neurobiology
10. Hematology
11. Muscle Physiology

No. 1. JANUARY 1972

SECTION		PAGE
6	Effect of local heating and arterial occlusion on sweat electrolyte content. *R. S. Elizondo, M. Banerjee, and R. W. Bullard*	1
1, 6	Effect of carbon monoxide on reflex vasoconstriction in man. *D. D. Heistad and R. C. Wheeler*	7
1	Carotid sinus counterpressure as a baroreceptor stimulus in the intact dog. *S. J. Shubrooks, Jr.*	12
1, 2	Distribution of airway resistance with developing pulmonary edema in dogs. *J. C. Hogg, J. B. Agarawal, A. J. S. Gardiner, W. H. Palmer, and P. T. Macklem*	20
2	Effect of lung inflation on bronchial length and diameter in excised lungs. *J. M. Hughes, F. G. Hoppin, Jr., and J. Mead*	25
3	A role for the Starling (nonlinear) resistorlike action of renal proximal tubules. *B. M. Brenner, J. L. Troy, and T. M. Daugharty*	36
2, 11	Effect of CO_2 and pH on bronchoconstriction caused by serotonin vs. acetylcholine. *G. M. Sterling, P. E. Holst, and J. A. Nadel*	39
2, 6	Hypoxic and hypercapnic ventilatory drives in children native to high altitude. *E. Byrne-Quinn, I. E. Sodal, and J. V. Weil*	44
1, 2	Site of pulmonary vascular resistance in fetal goats. *R. D. Gilbert, J. R. Hessler, D. V. Eitzman, and S. Cassin*	47
2, 6, 10	Plasma erythropoietin in men and mice during acclimatization to different altitudes. *P. H. Abbrecht and J. K. Littell*	54
2, 6	Acid-base balance after maximal exercise of short duration. *J. B. Osnes and L. Hermansen*	59
1, 2, 8	Transfer of inert gases and tritiated water across the sheep placenta. *J. M. Bissonnette and G. H. Gurtner*	64
1, 6	Cardiac acceleration elicited by voluntary muscle contractions of minimal duration. *C. Borst, A. P. Hollander, and L. N. Bouman*	70
6	An examination of regenerating hepatic tissue subjected to radio-frequency irradiation. *B. D. McLees, E. D. Finch, and M. L. Albright*	78
6	High-frequency pulsatile discharge of human sweat glands: myoepithelial mechanism. *J. Nicolaidis and J. Sivadjian*	86
1, 8	Canine transthoracic resistance. *G. A. Ewy, M. D. Ewy, A. J. Nuttell, and A. W. Nuttell*	91
2, 6	Unattenuated ventilatory hypoxic drive in ovine and bovine species native to high altitude. *S. Lahiri*	95
2, 9	Vagal control of ventilation and respiratory muscles during elevated pressures in the cat. *B. Bishop and H. Bachofen*	103
2	Long-term autotransplanted canine lungs: base-line ventilatory and hemodynamic function. *G. M. Tisi, M. J. Trummer, A. J. Cuomo, W. L. Ashburn, and K. M. Moser*	113

SPECIAL COMMUNICATIONS

2	Linearity and frequency response of pneumotachographs. *K. E. Finucane, B. A. Eagan, and S. V. Dawson*	121
1, 2	Conversion of a disposable oxygenator into a reusable unit. *R. L. Jones, C. A. Dawson, and L. H. Hamilton*	127
3	Measurement of fetal renal inulin clearance in a chronic sheep preparation. *T. H. G. Rankin, E. L. Gresham, F. C. Battaglia, E. L. Makowski, and G. Meschia*	129
2, 6, 10	Estimation of arterial P_{O_2}, P_{CO_2}, pH, and lactate from arterialized venous blood. *H. V. Forster, J. A. Dempsey, J. Thomson, E. Vidruk, and G. A. doPico*	134
8, 9	An exploring chemitrode device for direct chemical stimulation of the brain. *P. J. Morgane, J. D. Bronzino, and W. S. Stern*	138
7, 8, 9	An electromechanical apparatus to seal freeze-dried tissue specimens under vacuum. *C. E. Aronson*	143
1	New technic for measurement of physiological parameters in conscious animals. *F. K. Nakhjavan*	145
1	A nondestructive technique to measure wall displacement in the thoracic aorta. *R. M. Olson and D. K. Shelton, Jr.*	147
1, 2	Normal arterial blood pH, oxygen, and carbon dioxide tensions in unanesthetized dogs. *E. O. Feigl and L. G. D'Alecy*	152

No. 2. FEBRUARY 1972

2, 6	Production of gaseous nitrogen in human steady-state conditions. *J. H. Cissik, R. E. Johnson, and D. K. Rokosch*	155
2	Mucociliary clearance after lung denervation and bronchial transection. *J. S. Brody, G. Klempfner, M. M. Staum, D. Vidyasagar, D. E. Kuhl, and J. A. Waldhausen*	160

SECTION		PAGE
1, 2, 6	Changes in mixed venous gas tensions at start of exercise in man. *R. H. T. Edwards, D. M. Denison, G. Jones, C. T. M. Davies, and E. J. M. Campbell*	165
5, 6, 11	Inhibition of glucose uptake by epinephrine in dogs during cold exposure. *J. Chatonnet, Y. Minaire, A. Pernod, and J. C. Vincent-Falquet*	170
2, 6	Short-term effects of ozone on the lung. *D. V. Bates, G. M. Bell, C. D. Burnham, M. Hazucha, J. Mantha, L. D. Pengelly, and F. Silverman*	176
1	Hemodynamic effects of hypertonic sodium chloride. *G. G. Rowe, D. H. McKenna, R. J. Corliss, and S. Sialer*	182
1, 2, 6	Oxygen intake and cardiac output during maximal treadmill and bicycle exercise. *M. Miyamura and Y. Honda*	185
2, 9, 11	Reflex increase in ventilation by muscle receptors with nonmedullated fibers (C fibers). *M. Kalia, J. M. Senapati, B. Parida, and A. Panda*	189
6	External auditory canal temperature as an estimate of core temperature. *J. E. Greenleaf and B. L. Castle*	194
5, 6	Effects of daily infusions of noradrenaline on metabolism and skin temperature in rabbits. *T. Nagasaka*	199
1, 6, 8	Effect of sustained muscular contraction on tolerance to $+G_z$ acceleration. *L. A. Lohrbauer, R. L. Wiley, S. J. Shubrooks, and M. McCally*	203
1, 6, 11	Muscle blood flow during submaximum and maximum exercise on a bicycle ergometer. *F. Pirnay, R. Marechal, R. Radermecker, and J. M. Petit*	210
1	Importance of splanchnic vascular bed in human blood pressure regulation. *L. B. Rowell, J.-M. R. Detry, J. R. Blackmon, and C. Wyss*	213
2	Pulmonary capillary carbon dioxide gradients and the Wein effect. *R. M. Effros*	221
1, 6	Hemodynamic effects of oxygen at 1 and 2 Ata pressure in healthy subjects. *A. C. F. Kenmure, W. R. Murdoch, I. Hutton, and A. J. V. Cameron*	223
6	Convective heat transfer from the human form. *Y. Tamari and E. F. Leonard*	227
6	Effect of carbon monoxide on oxygen transport during exercise. *J. A. Vogel and M. A. Gleser*	234
1, 7, 8	Growth of the fetal calf and its arterial pressure, blood gases, and hematologic data. *J. T. Reeves, F. S. Daoud, and M. Gentry*	240
1, 2, 6	Heart and lung functions in swimmers and nonathletes during growth. *G. M. Andrew, M. R. Becklake, J. S. Guleria, and D. V. Bates*	245

SPECIAL COMMUNICATIONS

1, 2, 9	Direct-current circuit for regulating temperature of small experimental animals. *M. A. Bakker, R. O. Davies, and M. W. Edwards, Jr.*	252
1	Analysis on diffusion and convection of protein in tissue. *J. S. Lee*	254
1, 11	An improved transducer to measure left ventricular wall thickness in open-chest dogs. *P. A. McHale, C. A. Haliasos, and J. C. Greenfield, Jr.*	257
1, 6	Transmitter for recording respiration rate information by radiotelemetry. *J. L. Riley*	259
1, 10	Thrombus production by turbulence. *R. L. Smith, E. F. Blick, J. Coalson, and P. D. Stein*	261
1	Applications of analog computing circuits to cardiovascular research. *P. M. Mellor*	265
1	Long-term measurement of pulsatile blood pressure and ECG in the squirrel monkey. *J. E. Levasseur, K. C. Corley, B. M. Butler, C. R. Fields, and F. T. Grove*	271
1	A Teflon membrane for measurement of blood and intramyocardial gas tensions by mass spectroscopy. *J. W. Brantigan, V. L. Gott, and M. N. Martz*	276
3	Desiccant-induced ultrafiltration across an artificial membrane. *C. M. Grossman*	283

No. 3. MARCH 1972

2	Diffusing capacity of the lung for CO in man during acute acclimation to 14,246 ft. *R. B. Weiskopf and J. W. Severinghaus*	285
9, 11	Jendrassik maneuver facilitation and fractionated patellar reflex times. *K. C. Hayes*	290
2	Topography of pleural surface pressure after pneumo- or hydrothorax. *G. Miserocchi, E. D'Angelo, and E. Agostoni*	296
6, 11	Blood and muscle pH after maximal exercise in man. *L. Hermansen and J.-B. Osnes*	304
1, 3, 10	Experimental meningococcemia: model of overwhelming infection in unanesthetized monkeys. *R. B. Mellins, O. R. Levine, H. J. Wigger, G. Leidy, and E. C. Curnen*	309
1, 2	Cardiorespiratory functions during histotoxic hypoxia caused by cobalt. *H. D. Van Liew and P.-Y. Chen*	315
1, 4	Hemodynamics in the dog liver after carbon tetrachloride injury. *J. Takeuchi, T. Kubo, H. Yoshida, T. Kitagawa, and T. Tone*	320
2	Effect of increased lung recoil pressure on maximal expiratory flow in normal subjects. *S. E. Stubbs and R. E. Hyatt*	325
2	Stresses, strains, and surface pressures in the lung caused by its weight. *J. B. West and F. L. Matthews*	332
1, 2	Pattern of filling in the pulmonary capillary bed. *D. A. Warrell, J. W. Evans, R. O. Clarke, G. P. Kingaby, and J. B. West*	346
1, 2	Effect of stratified inequality of blood flow on gas exchange in liquid-filled lungs. *J. B. West, J. E. Maloney, and B. L. Castle*	357

SECTION		PAGE
1, 6, 10	Hepatic blood flow and indocyanine green disappearance in hyperthermia and endogenous fever. *G. B. Spurr and N. J. Dwyer*	362
3, 6	Urine and plasma proteins in men at 5,400 m. *D. Rennie, R. Frayser, G. Gray, and C. Houston*	369
2, 6, 8	Pathogenesis of pulmonary oxygen toxicity: role of systemic hyperoxia and convulsions. *T. Reich, J. Tait, T. Suga, N. E. Naftchi, and M. Demeny*	374
1	Role of tachycardia in mediating the coronary hemodynamic response to severe exercise. *S. F. Vatner, C. B. Higgins, D. Franklin, and E. Braunwald*	380
1, 6, 8	Cardiovascular changes produced by brief whole-body vibration of animals. *R. G. Edwards, E. P. McCutcheon, and C. F. Knapp*	386
1, 2	Pulmonary blood volume in asthma. *R. N. Pierson, Jr., and M. H. Grieco*	391
2	Effect of trachealis muscle contraction on tracheal resistance to airflow. *R. F. Coburn, D. Thornton, and R. Arts*	397
1	Ventricular volume measurement in the awake dog using implanted thermistor beads. *J. Keroes and E. Rapaport*	404

SPECIAL COMMUNICATIONS

6, 7	Surface area in the Japanese monkey, *Macaca fuscata*. *T. Hori, H. Tokura, and E. Tadaki*	409
5, 6	Human calorimetry with a water-cooled garment. *P. Webb, J. F. Annis, and S. J. Troutman*	412
3, 8, 11	Measurement of intracellular potassium with liquid ion-exchange microelectrodes. *R. N. Khuri, J. J. Hajjar, and S. K. Agulian*	419
2, 8	A new nosepiece for measuring ventilation in preterm infants. *H. Rigatto and J. P. Brady*	423
1, 5, 8	A method for determining growth rates of individual rats in parabiosis. *N. W. Shier and O. Mickelsen*	425
3, 5	A method for measurement of urinary kallikrein. *M. Marin-Grez and O. A. Carretero*	428
1	Skin blood flow by ^{133}Xe disappearance validated by venous occlusion plethysmography. *J. E. Chimoskey*	432
2, 8, 9	A new method for simultaneous Po_2 and action potential measurement in microareas of tissue. *S. Kunke, W. Erdmann, and H. Metzger*	436
6, 8, 11	An inexpensive, safe, and effective shocking device for laboratory animals. *K. C. Mylrea, G. A. Brooks, and R. Cassens*	439

No. 4. APRIL 1972

6, 10	Erythrocyte life-span in mice acclimatized to different degrees of hypoxia. *P. H. Abbrecht and J. K. Littell*	443
1, 6	Vascular responses of Korean ama to hand immersion in cold water. *K. S. Paik, B. S. Kang, D. S. Han, D. W. Rennie, and S. K. Hong*	446
1, 2, 6	Liquid breathing: prevention of pulmonary arterial-venous shunting during acceleration. *D. J. Sass, E. L. Ritman, P. E. Caskey, N. Banchero, and E. H. Wood*	451
6	Heat of evaporation of sweat: thermodynamic considerations. *C. B. Wenger*	456
2	Glottis opening and airway resistance. *D. C. Stănescu, J. Pattijn, J. Clément, and K. P. van de Woestijne*	460
1, 2, 6	Maximal aerobic power during laddermill climbing, uphill running, and cycling. *E. Kamon and K. B. Pandolf*	467
2, 6	Respiratory weight losses during exercise. *J. W. Mitchell, E. R. Nadel, and J. A. J. Stolwijk*	474
2	Glucose metabolism and glycoprotein synthesis by lung slices. *H. Yaeger, Jr., and D. Massaro*	477
2	Number of alveoli in the human lung. *G. E. Angus and W. M. Thurlbeck*	483
1, 2	Effect of hyperoxia on airways resistance in man. *K. M. S. Dewar, G. Smith, A. A. Spence, and I. McA. Ledingham*	486
6, 11	Utilization of muscle elasticity in exercise. *H. Thys, T. Faraggiana, and R. Margaria*	491
1, 3, 8	Creatinine distribution dynamics in the dog. *R. L. Heppner, R. B. Harvey, and J. B. Bassingthwaighte*	495
1, 6	Adaptation to hypobarism: sensitivity of myocardial tissue to carbon dioxide. *J. F. Souhrada and R. W. Bullard*	501
6	Skin and muscle components of blood flow in directly heated resting man. *J.-M. R. Detry, G. L. Brengelmann, L. B. Rowell, and C. Wyss*	506
1, 3	Absence of pooling with endotoxin shock in the canine kidney. *W. G. Guntheroth, T. Hougen, and E. L. Kaplan*	512
1, 6	Hemodynamic correlates of myocardial oxygen consumption during upright exercise. *K. Kitamura, C. R. Jorgensen, F. L. Gobel, H. L. Taylor, and Y. Wang*	516

SPECIAL COMMUNICATIONS

2, 8	Pneumograph recordings using a cotton-wick probe. *J. W. Prather, L. Walker, and D. N. Bowes*	523
2, 8	A focusing electrode bridge for unilateral lung resistance. *J. W. Severinghaus, C. Catron, and W. Noble*	526
6, 8, 11	An EMG electrode system for selected-site recording from a muscle. *T. J. Steiner, A. J. Thexton, and W. V. Weber*	531
1, 3, 8	Geometric error in tissue gamma-counting: methods for minimization. *M. A. Katz and R. C. Blantz*	533
2	A phase method of calculating respiratory mechanics using a digital computer. *M. Hilberman, R. W. Stacy, and R. M. Peters*	535
6, 11	Glycogen distribution in dog skeletal muscle. *C. K. Chapler, and W. G. Moore*	542
1	On-line measurement of microvascular dimensions by television microscopy. *M. Intaglietta and W. R. Tompkins*	546

SECTION			PAGE
1, 6	Comparison of volume and strain-gauge plethysmography during static effort.	*A. R. Lind and P. G. Schmid*	552
2	A method for measuring respiratory mechanics in small newborn (premature) infants.	*G. Polgar and G. Lacourt*	555
1, 3, 8	Microdimensional pressure measurements in electrolytes.	*H. Fein*	560
2	A constant-volume whole-body plethysmograph with a self-closing door.	*F. J. McIlreath*	565
4, 8, 11	Contractile force transducer for recording muscle activity in unanesthetized animals.	*P. Bass and J. N. Wiley*	567
1, 8	A miniature friction flowmeter for use in rat testicular artery and other small vessels.	*R. A. Jaffe and M. J. Free*	571

No. 5. MAY 1972

1, 6	Stroke volume during recovery from supine bicycle exercise.	*G. R. Cumming*	575
2, 3, 7	Effect of intravenous vs. aspirated distilled water on serum electrolytes and blood gas tensions.	*J. H. Modell, E. J. Kuck, B. C. Ruiz, and H. Heinitsh*	579
4	Acid loss in the human duodenum.	*D. H. Winship, C. R. Caflisch, and W. J. Schulte*	585
2	Breathing of half-micron aerosols. I. Experimental.	*C. N. Davies, J. Heyder, and M. C. Subba Ramu*	591
2	Breathing of half-micron aerosols. II. Interpretation of experimental results.	*C. N. Davies*	601
9	Extracorporeal perfusion of choroid plexus.	*M. Pollay, A. Stevens, E. Estrada, and R. Kaplan*	612
1, 6, 11	Kinetics of cardiac output and respiratory gas exchange during exercise and recovery.	*C. T. M. Davies, P. E. di Prampero, and P. Cerretelli*	618
2	Effective elastance of the respiratory system in dogs.	*A. R. McClelland, G. W. Benson, and P. Lynne-Davies*	626
2, 6, 8	Intolerance of the ischemic lung to hypothermic ventilation.	*J. C. Dougherty, S. Sinha, F. Kibble, and F. J. Veith*	632
6	Body temperatures and sweating during exhaustive exercise.	*B. Saltin, A. P. Gagge, U. Bergh, and J. A. J. Stolwijk*	635
2	Emptying pattern of lung compartments in normal man.	*S. Tsunoda, A. C. Young, and C. J. Martin*	644
1, 6, 9	Cerebral O_2, CO_2, regional cerebral vascular control, and hyperbaric oxygenation.	*J. W. Bean, J. Lignell, and D. W. Burgess*	650
5, 9	A stable preparation for rat brain perfusion: effect of flow rate on glucose uptake.	*J. A. Zivin and J. F. Snarr*	658
5, 9	Glucose and D(—)-3-hydroxybutyrate uptake by isolated perfused rat brain.	*J. A. Zivin and J. F. Snarr*	664
1, 3	Effect of acetylcholine on the renal vasculature in normal man.	*A. Rashid, N. K. Hollenberg, D. F. Adams, H. S. Solomon, H. L. Abrams, and J. P. Merrill*	669
2	Interdependence of lung units in isolated dog lungs.	*H. Menkes, G. Gamsu, R. Schroter, and P. T. Macklem*	675
2	Interdependence of lung units in intact dog lungs.	*H. Menkes, D. Lindsay, L. Wood, A. Muir, and P. T. Macklem*	681
1, 2, 6	Cerebral arteriovenous oxygen difference in man native to high altitude.	*J. S. Milledge and S. C. Sørensen*	687
6	Muscle metabolites and oxygen uptake in short-term submaximal exercise in man.	*H. G. Knuttgen and B. Saltin*	690

SPECIAL COMMUNICATIONS

2	Modified technique for measuring pulmonary shunts using xenon and indocyanine green.	*J. F. Murray, F. F. Davidson, and J. B. Glazier*	695
1, 8	Superior sagittal sinus as a chronic venous route in the rat.	*J. M. Lipton*	701
8, 11	A loudspeaker servo system for use in studying muscle mechanics.	*N. F. Clinch and V. A. Tennant*	703
6	Terrain coefficients for energy cost prediction.	*R. G. Soule and R. F. Goldman*	706
5, 6, 11	Blood lactic acid—a micromethod adapted to field collection of microliter samples.	*J. R. Harrower and C. Brown*	709
1, 6, 10	Evaluation of hemoconcentration from hematocrit measurements.	*W. van Beaumont*	712
4, 8	A method for preparing oxyntic cells from frog gastric mucosa.	*J. G. Forte, T. K. Ray, and J. L. Poulter*	714

Vol. 32, No. 6, June 1972. *Printed in U.S.A.*

Subject Index to Volume 32

Acceleration, prevention of pulmonary arterial-venous shunting during, 451
Acclimatization, altitude, 44,95
  erythrocyte life-span, 443
  plasma erythropoietin, 54
  pulmonary diffusing capacity for CO, 285
Acetylcholine
  effect of CO_2 and pH on bronchoconstriction caused by, 39
  effect on renal vasculature, 669
Acid-base balance, exercise, 59
Acid loss in duodenum, 585
Aerosols, half-micron, breathing of, 591, 601
Aging, lipid content of tissues, 761
Airflow, tracheal resistance to, 397
Airway resistance
  glottis opening, 460
  hyperoxia, 486
  lung inflation, 25
  pulmonary edema, 20
Altitude, high
  cerebral arteriovenous oxygen difference, 687
  hypoxic and hypercapnic ventilatory drives in children native to, 44
  plasma erythropoietin during acclimatization, 54
  pulmonary diffusing capacity for CO during acclimation to, 285
  unattenuated ventilatory hypoxic drive in natives of, 95
  urine and plasma proteins, 369
  ventilation during exercise, 776
Alveoli, number of in lung, 483
Ama, Korean, vascular responses to hand immersion in cold water, 446
Angiotensin, effects of after renal artery constriction, 859
Apparatus: *see* Methods and instrumentation
Artery, oxygen saturation in chronic lung disease, 776
Asthma
  inhibition of antigen-induced bronchoconstriction by atropine, 823
  pulmonary blood volume, 391
Atelectasis, dependent pulmonary, 451
Atropine
  inhibition of antigen-induced bronchoconstriction in asthmatics, 823
  phase relationships of intestinal muscularis, 734
Autotransplantation, lung, 113

Bacteremia, meningococcemia, 309
Blood
  affinity for oxygen in shock, 829
  Bohr effect, 749
  pH after exercise, 304
Blood flow
  cerebral, 658, 687
  coronary, exercise, 380
  distribution, 346
  effect of stratified inequality of, on gas exchange in liquid-filled lungs, 357
  finger, 446
  forearm, skin and muscle components in heat, 506
  hepatic, indocyanine green disappearance in hyperthermia and endogenous fever, 362
  muscle, exercise, 210
  renal, endotoxin shock, 512
  skin, by ^{133}Xe disappearance, 432
  stratification of in elongated lung of carpet python, 842
Blood gas tensions, effect of intravenous vs. aspirated distilled water, 579
Blood pressure
  arterial, fetus, 240
  importance of splanchnic vascular bed in regulation of, 213
Blood volume, pulmonary, asthma, 391
Bohr effect, 749
Brain
  glucose and D(−)-3-hydroxybutyrate uptake, 664

models, 535
mucociliary clearance after denervation, 160
number of alveoli, 483
ozone effects, 176
pathogenesis of oxygen toxicity, 374
stratified blood flow and gas exchange, 357
stresses, strains, and surface pressures caused by weight of, 332
thermal volume, 770
Lymph, pulmonary collateral flow, 812

Meeh-Rubner formula, 409
Meningococcemia, overwhelming infection, 309
Methandrostenolone, effect on reflex components, 795
Methods and instrumentation
algesimeter, 875
analog computing circuits in cardiovascular research, 265
blood lactic acid micromethod, 709
calculating respiratory mechanics with digital computer, 535
chemitrode device for direct chemical stimulation of brain, 138
comparison of volume and strain-gauge plethysmography during static effort, 552
computer evaluation of cardiac contractions, 724
constant-current source for microelectrodes, 881
constant-volume whole-body plethysmograph with a closing door, 565
contractile force transducer for recording muscle activity, 567
conversion of disposable oxygenator into reusable unit, 127
desiccant-induced ultrafiltration across artificial membrane, 283
determining growth rates of parabiotic rats, 425
diffusion and convection of protein in tissue, 254
digital heart rate meter, 718
direct-current circuit for temperature regulation, 252
effects of angiotensin after renal artery constriction, 859
electromechanical apparatus to seal freeze-dried tissue under vacuum, 143

EMG electrode system for selected-site recording from muscle, 531
estimation of arterial P_{O_2}, P_{CO_2}, pH, and lactate from arterialized venous blood, 134
evaluation of hemoconcentration from hematocrit measurements, 712
expired gas collection in scuba swimmers, 869
focusing electrode bridge for unilateral lung resistance, 526
glycogen distribution in skeletal muscle, 542
human calorimetry with water-cooled garment, 412
left ventricular size by roentgenography, 881
linearity and frequency response of pneumotachographs, 121
long-term measurement of pulsatile blood pressure in squirrel monkey, 271
loudspeaker servo system for muscle mechanics, 703
measurement of fetal renal inulin clearance, 129
measurement of intracellular potassium with liquid ion-exchange microelectrodes, 419
measurement of microvascular dimensions by television microscopy, 546
measurement of physiological parameters in conscious animals, 145
measuring pulmonary shunts with xenon and indocyanine green, 695
measuring respiratory mechanics in premature newborns, 555
microdimensional measurements in electrolytes, 560
miniature friction flowmeter for testicular artery, 571
multiple-unit microrespirometer, 872
nondestructive measurement of wall displacement in thoracic aorta, 147
normal arterial blood pH, oxygen, and CO_2 tensions in unanesthetized dogs, 152
nosepiece for measuring ventilation in preterm infants, 423
occlusion cuff flow control system, 864
phase relationships of intestine, 734
pneumograph recording with cotton-wick probe, 523
preparing oxyntic cells from gastric mucosa, 714
rapid injector for cardiac distensibility studies, 877
recording arterial diameter changes, 728
shocking device for laboratory animals, 439
simultaneous P_{O_2} and action potential measurement in microareas of tissue, 436
skin blood flow by ^{133}Xe disappearance validated by venous occlusion plethysmography, 432
superior sagittal sinus as chronic venous route, 701
surface area in Japanese monkey, 409
Teflon membrane for measurement of blood and intramyocardial gas tensions by mass spectroscopy, 276
terrain coefficients for energy cost prediction, 706
thrombus production by turbulence, 261
transducer to measure left ventricular wall thickness in open-chest dogs, 257
urinary kallikrein measurement, 428
Mixed venous gas tensions at start of exercise, 165
Muscle
abdominal, neural control, 798
blood flow during exercise, 210
elasticity in exercise, 491
gastrocnemius, reflex increase in ventilation by stimulation of receptors, 189
loudspeaker servo system for studying mechanics, 706
metabolites in exercise, 690
pH after exercise, 304
skeletal, glycogen distribution, 542
trachealis, effect of contraction on tracheal resistance to airflow, 397
Myocardium
metabolism during exercise, 847
oxygen consumption in exercise, 516
sensitivity to carbon dioxide, 501

Newborn, premature, measuring respiratory mechanics in, 423, 555
Nitrogen, gaseous, production in human steady-state conditions, 155
Noradrenaline metabolism and skin temperature, 199

Oxygen
arterial saturation in chronic lung disease, 776
blood affinity for in shock, 829
hemodynamic effects, 223
intake, exercise, 185
pathogenesis of pulmonary toxicity, 374
Oxygen consumption, myocardial, exercise, 516
Oxygen difference, cerebral arteriovenous, in high altitude natives, 687
Oxygen, hyperbaric
cerebral O_2, CO_2, and regional vascular control, 650
toxicity, 486
Oxygen tension, lymph, 806
Oxygen transport, effect of CO during exercise, 234
Oxygen uptake, exercise, 467, 690
Oxyntic cells, preparing from gastric mucosa, 714
Ozone, lung effects, 176

Panting, glottis opening and airway resistance, 460
Parabiosis, growth rate, 425
Patellar reflex times, 290
pH
blood and muscle, after exercise, 304
effect on bronchoconstriction caused by serotonin vs. acetylcholine, 39
Placenta, transfer of inert gases and tritiated water across, 64
Plasma
erythropoietin during acclimatization to altitudes, 54
proteins at altitude, 369
Plethysmography
constant-volume whole-body, 565
volume vs. strain-gauge, during static effort, 552
Pneumothorax, pleural surface pressure after, 296
Potassium, intracellular, measurement with liquid ion-exchange microelectrodes, 419
Protein, urine and plasma, at altitude, 369
Pulmonary capillary bed, pattern of filling, 346
Pulmonary diffusing capacity for CO during altitude acclimation, 285
Pulmonary gas exchange in tidal alveolus model, 834
Python, carpet, stratified blood flow in long lungs, 842

Radio-frequency irradiation, effects on regenerating hepatic tissue, 78
Rebreathing, alveolar-arterial P_{CO_2} difference, 782
Recruitment, pulmonary vascular, 346
Reflex components, effect of anabolic steroids, 795
Respiratory system, effective elastance, 626

Serotonin, effect of CO_2 and pH on bronchoconstriction caused by, 39
Shock
endotoxin, absence of pooling in kidney, 512
hemorrhagic and endotoxic, blood affinity for oxygen, 829
septic, meningococcemia, 309
Shunts, pulmonary, measuring with xenon and indocyanine green, 695
Smoking, cigarette, exercise, 745
Sodium chloride, hypertonic, hemodynamic effects, 182
Splanchnic vascular bed, human blood pressure regulation, 213
Starling resistor, 36, 47
Steroids, anabolic, effect on reflex components, 795
Stroke volume during recovery from exercise, 575
Sweat
effect of local heating and arterial occlusion on electrolyte content, 1
heat of evaporation of, 456
Sweat glands, pulsatile discharge, 86
Sweating, exercise, 635

Tachycardia, coronary hemodynamic response to exercise, 380
Temperature
body, exercise, 635
external auditory canal, as estimate of core temperature, 194
hypothalamic and tympanic membrane, 739
rectal, response to work, environment, and clothing, 812
skin, noradrenaline infusions, 199
Temperature regulation: *see* Thermoregulation
Thermodilution, ventricular volume measurement, 404
Thermoregulation
exercise, 635
forearm blood flow in heat, 506
respiratory weight losses during exercise, 474
sweat electrolyte content, 1
Trachea, trachealis muscle contraction and resistance to airflow, 397
Transthoracic resistance, 91
Tympanic membrane, thermal relationship with hypothalamus, 739

Urine
kallikrein, 428
proteins at altitude, 369

Vagus nerve, control of ventilation and respiratory muscles during elevated pressures, 103
Vascular resistance, pulmonary, site of, in fetal goats, 47
Vasoconstriction, reflex, carbon monoxide, 7
Ventilation
collateral, 675, 681
exercise at high altitude, 766
gravity and distribution of, 332
hypothermic, intolerance of ischemic lung to, 632
reflex increase by muscle receptors with nonmedullated fibers, 189
vagal control during elevated pressure, 103
Ventricle, left
roentgenographic assessment of size, 881
volume measurement, 404
Vibration, whole-body, cardiovascular responses, 386

Water
effect of intravenous vs. aspirated distilled, on serum electrolytes and blood gas tensions, 579
tritiated, placental transfer, 64
Water loss, respiratory, 474
Water transport, choroid plexus, 612
Weight loss, respiratory, 474
Wien effect, pulmonary capillary CO_2 gradients, 221

Xylocaine, phase relationships of intestinal muscularis, 734

Contents of Volume 33

Key to Sections	3. Renal & Electrolyte Physiology	6. Environmental Physiology & Exercise	9. Neurobiology
1. Circulation	4. Gastrointestinal Physiology	7. Comparative Physiology	10. Hematology
2. Respiration	5. Endocrinology & Metabolism	8. General Physiology	11. Muscle Physiology

No. 1. JULY 1972

SECTION		PAGE
1, 2	Evaluation of shunt flow through nonventilated gas-filled and gas-free alveoli in dogs. *D. F. Rochester and H. M. Thomas III*	1
6	Effect of posture on heat acclimatization in man. *J. T. Maher, D. E. Bass, D. D. Heistad, E. T. Angelakos, and L. H. Hartley*	8
1, 2	Macrophage accumulation and pulmonary edema due to thoracotomy and lung overinflation. *S. W. Woo and J. Hedley-Whyte*	14
3, 5, 8	Serum immunoreactive insulin and growth hormone response to potassium infusion in normal man. *R. G. Dluhy, L. Axelrod, and G. H. Williams*	22
1	"Diving reflex" in man: its relation to isometric and dynamic exercise. *S. A. Bergman, Jr., J. K. Campbell, and K. Wildenthal*	27
2	Alveolar surface tension in fluorocarbon-filled lungs. *J. A. Kylstra and W. H. Schoenfisch*	32
1, 2, 6	Effects of temperature, immersion, and ambient pressure on human apneic bradycardia. *T. O. Moore, Y. C. Lin, D. A. Lally, and S. K. Hong*	36
2	Effect of DL-penicillamine on fibrous proteins of rat lung. *L. Hoffman, O. O. Blumenfeld, R. B. Mondshine, and S. S. Park*	42
2, 6	Transient ventilatory response to graded hypercapnia in man. *W. J. Reynolds, H. T. Milhorn, Jr., and G. H. Holloman, Jr.*	47
6, 10	Disproportional changes in hematocrit, plasma volume, and proteins during exercise and bed rest. *W. van Beaumont, J. E. Greenleaf, and L. Juhos*	55
1, 2	Effects of diffusion impairment on O_2 and CO_2 time courses in pulmonary capillaries. *P. D. Wagner and J. B. West*	62
5, 6, 11	Effect of nicotinic acid on myocardial metabolism in man at rest and during exercise. *B. W. Lassers, M. L. Wahlqvist, L. Kaijser, and L. A. Carlson*	72
4	Effect of salicylates on the gastric mucosal barrier in man. *K. J. Ivey, S. Morrison, and C. Gray*	81
2, 6	Pulmonary gas exchange in dogs breathing SF_6 at 4 Ata. *R. R. Martin, M. Zutter, and N. R. Anthonisen*	86
2	Viscoelastic properties of alveolar wall. *T. Sugihara, J. Hildebrandt, and C. J. Martin*	93
6	Skin temperatures in warm environment and the control of sweat evaporation. *Y. Houdas, J. Colin, J. Timbal, C. Boutelier, and J. D. Guieu*	99
2	Volume history, static equilibrium, and dynamic compliance of excised cat lung. *T. Horie and J. Hildebrandt*	105
1, 2, 6	Effects of head-out immersion at 19.18 Ata on pulmonary gas exchange in man. *E. T. Flynn, H. A. Saltzman, and J. K. Summitt*	113
2	Chemoreceptor response in initiation of breathing in the fetal lamb. *D. E. Woodrum, J. T. Parer, R. P. Weinberg, and W. A. Hodson*	120
2	Gas-induced osmosis in the lung. *B. A. Hills*	126

SPECIAL COMMUNICATIONS

1, 8, 11	Simple method of stimulation and recording with a single microelectrode. *W. Tuganowski*	130
1	Measurement of left ventricular dimensions from implanted radiopaque markers. *S. J. Leshin, K. Wildenthal, C. B. Mullins, and J. H. Mitchell*	132
1	Electromagnetic flowmetry in anesthetized rats. *M. A. Pfeffer and E. D. Frohlich*	137
1	Reproducibility of indirect (CO_2) Fick method for calculation of cardiac output. *E. Zeidifard, M. Silverman, and S. Godfrey*	141
1, 5	Heat flow device for vaginal blood flow studies. *R. M. Abrams and J. A. J. Stolwijk*	144
1, 2	Determination of pulmonary pulsatile perfusion by fluoroscopic videodensitometry. *N. R. Silverman, M. Intaglietta, A. L. Simon, and W. R. Tompkins*	147
2	Flow limitation in a collapsible tube. *R. K. Lambert and T. A. Wilson*	150
2	Algorithms for selected blood acid-base and blood gas calculations. *L. J. Thomas, Jr.*	154
5, 9	Precision microbicannulation device for neuroendocrine or neurophysiologic applications. *J. J. DiStefano III*	159

No. 2. AUGUST 1972

SECTION		PAGE
6	Human tryptophan and tyrosine metabolism: effects of acute exposure to cold stress. *R. P. Francesconi, A. E. Boyd III, and M. Mager*	165
2, 3	Respiratory effects of hypochloremic alkalosis and potassium depletion in the dog. *R. W. Penman, R. G. Luke, and T. M. Jarboe*	170
1, 6, 7	Response to exercise after blood loss and reinfusion. *B. Ekblom, A. N. Goldbarg, and B. Gullbring*	175
6	Energy cost of pushing loaded handcarts. *M. F. Haisman, F. R. Winsmann, and R. F. Goldman*	181
6	Maximal aerobic power and energy expenditure of Eskimo hunters in Greenland. *O. Lammert*	184
2	Hypercapnia with relief of hypoxia in normal individuals with increased work of breathing. *R. M. Cherniack and W. B. Chodirker*	189
1, 2, 6	Cardiac response to apnea and water immersion during exercise in man. *P.-E. Paulev and H. G. Hansen*	193
5, 6, 11	Muscle lactate, ATP, and CP levels during exercise after physical training in man. *J. Karlsson, L.-O. Nordesjö, L. Jorfeldt, and B. Saltin*	199
3, 5, 6	Effects of simulated high altitude on renin-aldosterone and Na homeostasis in normal man. *M. Epstein and T. Saruta*	204
5	Evaluation of cardiopulmonary function and work performance in man during caloric restriction. *T. A. Daws, C. F. Consolazio, S. L. Hilty, H. L. Johnson, H. J. Krzywicki, R. A. Nelson, and N. F. Witt*	211
2, 6	Regional lung function during early acclimatization to 3,100 m altitude. *A. Dawson*	218
11	Muscle metabolism during isometric exercise performed at constant force. *B. Ahlborg, J. Bergström, L.-G. Ekelund, G. Guarnieri, R. C. Harris, E. Hultman, and L.-O. Nordesjö*	224
6	Effects of chloralose-urethan anesthesia on temperature regulation in dogs. *F. R. Sharp and H. T. Hammel*	229
5, 6	Control of rate-limiting enzymes in tryptophan metabolism during pulmonary O_2 toxicity. *A. R. Inamdar, M. Wittner, and R. M. Rosenbaum*	234

SPECIAL COMMUNICATIONS

1, 2, 3	Continuous O_2 monitoring of newborn and older infants and of children. *J. Strauss, A. V. Beran, and R. Baker*	238
2	A method for spirographic display of functional residual capacity and other lung volumes. *T. Ōkubo, J. Teichmann, and J. Piiper*	244
7, 9	Accurate and reliable intracerebral delivery of minute volumes of drug solutions. *L. W. Swanson, V. J. Perez, and L. G. Sharpe*	247
2	Changes in tidal volume, frequency, and ventilation induced by their measurement. *R. Gilbert, J. H. Auchincloss, Jr., J. Brodsky, and W. Boden*	252
5, 6	Design of a wind-tunnel metabolism chamber for small animals. *J. A. Gessaman*	255
2, 10	Carbon monoxide and methane production in rats, guinea pigs, and germ-free rats. *F. L. Rodkey, H. A. Collison, and J. D. O'Neal*	256
2, 6, 7	Determination of oxygen consumption by use of the paramagnetic oxygen analyzer. *R. W. Hill*	261
1, 2, 8	Concepts of residence time distribution applied to the indicator-dilution technique. *L. Wingard, T. Chorbajian, and S. Galla*	264
2, 6	Lack of effect of high altitude on hemoglobin oxygen affinity. *R. B. Weiskopf and J. W. Severinghaus*	276
1	Thoracic impedance changes following saline injection into right and left ventricles. *L. E. Geddes and L. E. Baker*	278
Letters to the Editor		282

No. 3. SEPTEMBER 1972

1, 6, 8	Heat acclimatization by exercise-induced elevation of body temperature. *P. Marcus*	283
1, 6	Analysis of femoral venous blood during maximum muscular exercise. *F. Pirnay, M. Lamy, J. Dujardin, R. Deroanne, and J. M. Petit*	289
2	Papain-induced experimental emphysema in the dog. *V. Marco, D. R. Meranze, M. Yoshida, and P. Kimbel*	293
6	Characteristics of subthreshold sudomotor neural impulses. *T. Ogawa and R. W. Bullard*	300
3, 5	Isolation of renin granules from the dog kidney cortex. *S. Morimoto, K. Yamamoto, and J. Ueda*	306
6, 11	Enzyme activity and fiber composition in skeletal muscle of untrained and trained men. *P. D. Gollnick, R. B. Armstrong, C. W. Saubert IV, K. Piehl, and B. Saltin*	312
1, 10	Acute effects of septic shock on plasma and red cell volumes in baboons. *D. L. Horwitz, T. V. N. Ballantine, and C. M. Herman*	320

indicator-dilution technique for study of blood-to-brain solute passage, 681
linear motion generator, 532
low drift transducer for small forces, 529
measurement of functional residual capacity, 515
measurement of left ventricular dimensions from implanted radiopaque markers, 132
measurement of norepinephrine and 5-hydroxytryptamine uptake by lung, 404
measurement of sensible heat transfer between man and his environment, 677
metabolic cost of exercise in children, 696
microbicannulation device for neuroendocrine or neurophysiologic applications, 159
NADH spectrofluorometry of skin, 684
removal of periodic noise by averaging, 536
reproducibility of indirect (CO_2) Fick method for cardiac output, 141
residence time distribution applied to indicator-dilution method, 264
single breath measurement of cardiac output, 846
spirographic display of functional residual capacity, 244
stimulation and recording with single microelectrode, 130
swimming flume, 514

temperature transmission from biopotential radiotelemetry transmitters, 397
thoracic impedance after saline injection, 278
ultrasonic pulmonary artery diameter measurements, 542
vagal stimulation in chronic experiments, 402
vaginal blood flow, 144
wind-tunnel metabolism chamber, 255
Mitochondria, effect of maturation and training on size distributions in hearts, 715
Muscle
absence of cardiovascular and respiratory responses to vibration, 623
diet, exercise, and glycogen in, 421
extraocular, effect of succinylcholine on tension, 788
isovolumic contraction dynamics, 409
lactate, ATP, and CP levels during exercise after training, 199
metabolism during exercise with concentric and eccentric contractions, 792
metabolism in isometric exercise, 224
skeletal, enzyme activity and fiber composition, 312
Myocardium, effect of nicotinic acid on metabolism during exercise, 72

Newborn, intraesophageal and intrapleural pressures, 415
Nicotinic acid, effect on myocardial metabolism during exercise, 72
Norepinephrine
thermoregulatory responses, 341
uptake by lung, 404
Norepinephrine injury, cardiac metabolism, 325

Obesity, peripheral airways patency, 559
Ocular pressure, succinylcholine, 788
Oleate, cardiac metabolism of in *l*-norepinephrine injury, 325
Osmosis, gas-induced, in lung, 126
Oxygen
arterial, increase by high carbohydrate diet at altitude, 441
hyperbaric, inhibition and reversal of intranuclear RNA synthesis, 820
Oxygen exchange in pulmonary capillaries, diffusion impairment, 62
Oxygen intake, maximal, age and activity, 805
Oxygen toxicity, enzymes of tryptophan metabolism, 234
Oxygen uptake, exercise, 351, 502, 510, 611

Papain, emphysema, 293
Penicillamine, lung fibrous proteins, 42
pH arterial, distribution of barbiturates between pulmonary tissue and blood, 656
Plasma, changes in volume and proteins during exercise and bed rest, 55
Plasma volume, septic shock, 320
Pneumothorax
medullary respiratory neuron response, 390
newborn, 415
Posture, heat acclimatization, 8
Potassium
balance, 688
depletion, respiratory effects, 170
serum immunoreactive insulin and growth hormone response to infusion of, 22
Pressure, ambient, apneic bradycardia, 36
Protein
influence of starvation on amino acid incorporation into, 381
lung fibrous, effect of DL-penicillamine, 42
plasma, changes during exercise and bed rest, 55

Radiography, left ventricular volume, 365
Rebreathing, gas-blood CO_2 equilibration in lungs during, 582
Red cell volume, septic shock, 320
Renin
high altitude and plasma activity, 204
isolation of granules from kidney cortex, 306
release after unilateral renal denervation, 649
Respiration
transient ventilatory response to hypercapnia, 47
ventilatory on-transients during work, 744
Rest, bed, changes in hematocrit, plasma volume, and proteins, 55
Ribonucleic acid, intranuclear synthesis, 820

Salicylates, effect on gastric mucosal barrier, 81
Salt load, mediation of renal vascular response, 491
Seasonal variations of potency of adrenal cortex extract, 600
Shivering, ventilation during exercise, 778
Shock, septic, plasma and red cell volumes, 320
Shunt flow through nonventilated gas-filled and gas-free alveoli, 1
Skin, NADH in, 684
Sodium
balance, 688
homeostasis at high altitude, 204
Spine, electrograms from epidural space, 468
Starvation, amino acid incorporation into protein, 381
Stress
cold, tryptophan and tyrosine metabolism, 165
heat, indices of humidity and temperature, 436
thermal, acceleration tolerance, 418
Succinylcholine, ocular pressure and extraocular muscle tension, 788
Sudomotor neural impulses, subthreshold, 300
Sulfur hexafluoride, pulmonary gas exchange while breathing, 86
Sweat, skin temperatures and control of evaporation of, 99
Sweating, subthreshold sudomotor neural impulses, 300
Swimming, oxygen uptake, 502, 510

Temperature
apneic bradycardia, 36
lower critical, 451
critical water, for diving, 770
Temperature, body
during negative work exercise, 553
elevation of and tolerance to G_z acceleration, 418
heat acclimatization by exercise-induced elevation of, 283
Temperature, skin
control of sweat evaporation, 99
preferred, 699
Temperature regulation
chloralose-urethan anesthesia, 229
during dehydration and rehydration, 446
negative work exercise, 553
posterior hypothalamic response to thermal stimulation, 547
response to norepinephrine, 341
trauma, 665
Thoracotomy, macrophage accumulation and pulmonary edema, 14
Thyroid gland, rhythmicity during bed rest, 644
Training
aging, 346
enzyme activity and fiber composition of skeletal muscle, 312
hormonal responses to exercise, 602, 607
mitochondrial size distributions in hearts, 715
muscle metabolites after, 199
oxygen uptake during swimming, 502, 510
Trauma, hypothalamic response to thermal stimulation, 665
Triglyceride, cardiac metabolism in early *l*-norepinephrine injury, 325
Tryptophan
cold stress and metabolism of, 165
enzymes of metabolism in oxygen toxicity, 234
Tyrosine, cold stress and metabolism of, 165

Urethan, effects of anesthesia with chloralose and, on temperature regulation, 229
Urine flow during intermittent positive-pressure breathing, 362

Vagina, blood flow, 144
Vagus nerve, asthma in allergic dogs, 719
Vein, femoral, blood analysis during exercise, 289
Venous congestion, exercise tolerance during, 704
Ventilation
continuous positive-pressure, pulmonary edema, 385
effect of speed vs. grade and shivering during exercise, 778
pattern changes after ablation of respiratory feedback mechanisms, 431
Ventricle, left, volume, 132, 365
Viscoelasticity of alveolar wall, 93
